kernels

```
mv initrd.img to initrd.zip
unzip initrd.zip
 → extract initrd.buffalo
(YvSInIQopeipx66t_DCdfEvfP47qeVPhNhAuSYmA4）
```

acp_commander.jar

http://downloads.buffalo.nas-central.org/TOOLS/ALL_LS_KB_ARM9/ACP_COMMANDER/

　2013/02/01

```
  F:\acpcommander>java -jar acp_commander.jar -t xxx.xxx.xxx.xxx -o
  there seems to be no existing prefs, write default values
  ACP_commander out of the nas-central.org (linkstationwiki.net) project.
  Used to send ACP-commands to Buffalo linkstation(R) LS-PRO.
  WARNING: This is experimental software that might brick your linkstation!
  Using random connID value = B9A859BF7526
  Using target:   HS-DHGLCA1/xxx.xxx.xxx.xxx
  Starting authentication procedure...
  Sending Discover packet...
  Found:  HS-DHGLCA1 (/xxx.xxx.xxx.xxx)      HS-DHGL(JINMU) (ID=00010)
mac: 00:16:01:xx:xx:xx  Firmware=  1.200      Key=xxxxxxxx
  Trying to authenticate EnOneCmd...      ACP_STATE_OK
  start telnetd...        OK (ACP_STATE_OK)
  Reset root pwd...       Password changed.
  You can now telnet to your box as user 'root' providing no / an  empty
password.
  F:\acpcommander>
```

telnet

```
 $ telnet xxx.xxx.xxx.xxx
 Trying xxx.xxx.xxx.xxx...
 Connected to xxx.xxx.xxx.xxx.
 Escape character is '^]'.
```

```
